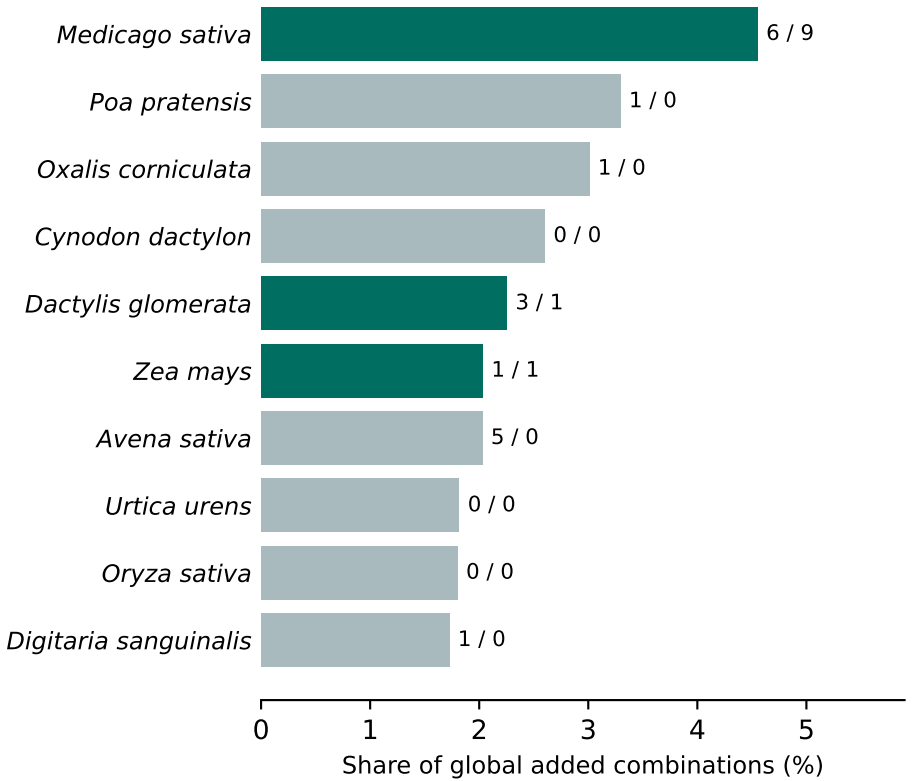
Which globally important hosts precede butterfly records on islands?

Plant records within 5 km of ports, 2001–2010 / Butterfly first records anywhere on the island, 2011–2024

A Global top ten



B Earlier host at port → later island first record

Medicago sativa

Fyn	Kerteminde	
	2019	*Colias croceus*
	2019	*Colias hyale*
Lolland	Bandholm, Nysted, Rodby Havn, Sakskobing	
	2015	*Colias croceus*
	2015	*Colias hyale*
Bornholm	Ronne	
	2013	*Issoria lathonia*
	2019	*Colias croceus*
Whidbey	Coupeville	
	2022	*Glaucopsyche lygdamus*
	2023	*Vanessa cardui*
	2024	*Colias eurytheme*

Dactylis glomerata

Honshu	Niigata Ko, Soma	
	2013	*Minois dryas*

Zea mays

Santa Cruz (CA)	Prisoners	
	2017	*Vanessa cardui*

A: labels give islands with a prior host record / later compatible butterfly–island events (27 islands screened).

B: catalogue host matches; port names locate the plant records. Butterfly arrival, local feeding and establishment were unobserved.
