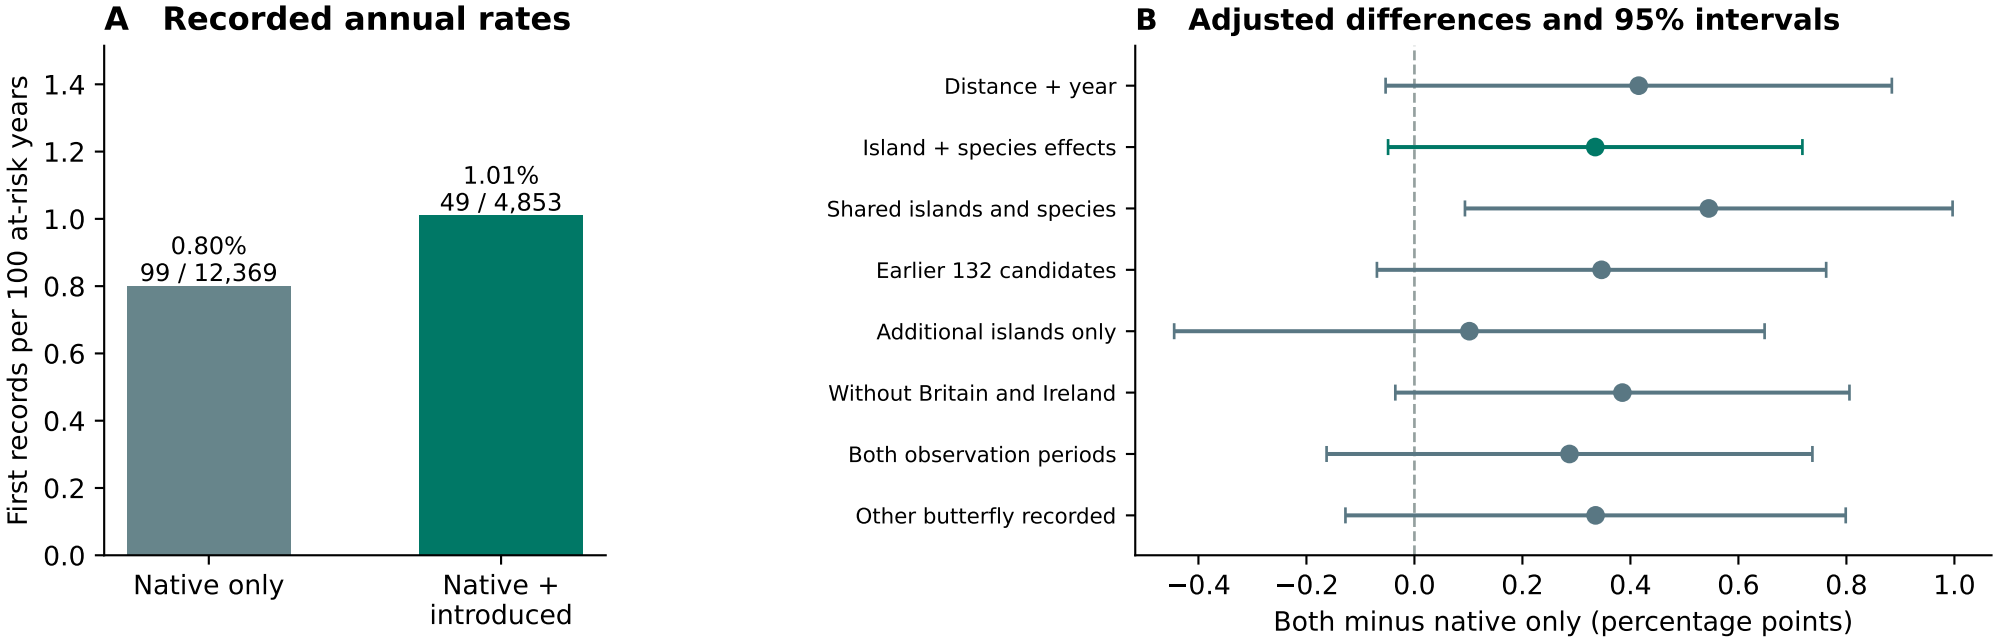
Island butterfly first records outside Denmark and Germany

No route requirement · 74 islands · 161 butterfly species · 148 first records



Both groups occurred within 29 islands and, separately, within 84 species. Plant inventories: 2001–2010; butterfly records: 2011–2024.

Distance is updated annually to the nearest earlier conspecific port island. All rows below the first also adjust for island and species.
